

Two-Stage Turn Queue Boxes What Are They?

d.

Bicycle lanes and cycle tracks located on the right side of the roadway pose challenges for cyclists making left turns.

A two-stage turn queue box offers bicyclists a way to make left turns at multi-lane signalized intersections from a right side cycle track or bike lane.

In order to use the two-stage turn box, proceed straight through the intersection with the green signal and wait in a queue box in front of vehicle traffic on the cross street to proceed through the intersection when the cross street gets a green signal.
