

THIS FORM MUST BE COMPLETED AND ATTACHED TO ALL SUBMITTALS

In accordance with the (1) Buy American Act (BAA) pursuant to 41 U.S.C. §§ 8301-8303 and 48 CFR 25.100 and FAR 52.225; (2) Buy America (BA) pursuant to the Surface Transportation Assistance Act (Public Law 97-424, 1983) codified at 23 U.S.C. § 313 and implemented under 23 CFR 635.410; and (3) Build America, Buy America Act (BABA) pursuant to the Infrastructure Investment and Jobs Act (IIJA) (Pub. L. 117-58) implemented under 2 CFR 184; as well as, Executive Order 10582 (1954); Executive Order 13881 (2019); and Executive Order 14005 (2021), Prime Contractor Representative hereby certifies to the District of Columbia to abide by all applicable domestic content procurement preference for all products delivered to the project site.

Every article, material, or supply, whether manufactured and/or incorporated together must be classified into ONE of the following categories. Please check the box that applies to your specific Pay Item Code to be delivered to the project site. Please attach supporting documents from the producer/fabricator/manufacturer confirming specifications and country/manufacture of origin.

- I. **Iron and Steel** (including wholly or predominantly, greater than 50 percentage, of iron or steel or a combination of both), certification requires all manufacturing processes, from initial melting, through final shaping, coating (epoxy coating, galvanizing, aluminizing, painting, etc. to protect or enhance value), and assembly, occurred in the United States.
- II. **Manufactured Products** certification requires that (1) product was manufactured in the United States, and (2) the cost of the components that is mined, produced, or manufactured in the United States is greater than 65% of total cost of all components of the product.
- III. **Construction Materials:**
 1. Non-ferrous Metals, certification requires all manufacturing processes, from initial smelting or melting through final shaping, coating, and assembly, occurred in the United States.
 2. Plastic and Polymer-Based Products (including polyvinyl chloride, composite building materials, and polymers used in fiber optic cables), certification requires all manufacturing processes, from initial combination of constituent plastic or polymer-based inputs, or, where applicable, constituent composite materials, until the item is in its final form, occurred in the United States.
 3. Glass (including optic glass), certification requires all manufacturing processes, from initial batching and melting of raw materials through annealing, cooling, and cutting, occurred in the United States
 4. Fiber Optic Cable (including drop cable), certification requires all manufacturing processes, from the initial ribboning (if applicable), through buffering, fiber stranding and jacketing, occurred in the United States. All manufacturing processes also include the standards for glass and optical fiber, but not for non-ferrous metals, plastic and polymer-based products, or any others.
 5. Optical Fiber, certification requires all manufacturing processes, from the initial preform fabrication stage through the completion of the draw, occurred in the United States.
 6. Lumber, certification requires all manufacturing processes, from initial debarking through treatment and planning, occurred in the United States.
 7. Engineered Wood, certification requires all manufacturing processes from the initial combination of constituent materials until the wood product is in its final form, occurred in the United States.
 8. Drywall, certification requires all manufacturing processes, from initial blending of mined or synthetic gypsum plaster and additives through cutting and drying of sandwiched panels, occurred in the United States.
- IV. **BABA Section 70917(c) Materials:** (indicate whether made or sourced from the United States)
 1. Cement and cementitious materials
 2. Aggregates such as stone, sand, or gravel
 3. Aggregate binding agents or additive

SIGNATURE CERTIFYING COMPLIANCE

This certifies that all quantities of the Item Code/Pay Item mentioned above comply with the governing specifications and certification requirements. Any alterations made to this document by an agency other than the Prime Contractor will invalidate the certification. Any changes to the producer/fabricator/manufacturer to the information provided requires a new certification form. Supporting documentation from the producer/fabricator/manufacturer confirming compliance for the product listed under the Item Code/Pay Item is attached.

Infrastructure project means any activity related to the construction, alteration, maintenance, or repair of infrastructure in the United States regardless of whether infrastructure is the primary purpose of the project.

Manufactured products mean articles, materials, or supplies that have been processed into a specific form and shape, or, combined with other articles, materials, or supplies to create a product with different end properties. In determining whether the cost of components for manufactured products is greater than 65 percent of the total cost of all components, use the following instructions:

- (a) For components purchased by the manufacturer, the acquisition cost, including transportation costs to the place of incorporation into the manufactured product (whether or not such costs are paid to a domestic firm), and any applicable duty (whether or not a duty-free entry certificate is issued); or
- (b) For components manufactured by the manufacturer, all costs associated with the manufacture of the component, including transportation costs as described in paragraph (a) of this section, plus allocable overhead costs, but excluding profit. The cost of components does not include any costs associated with the manufacture of the manufactured product.
