Single Member District Commissioners 01-Lee Brian Reba; 02-_Gwendolyn Bole; 03-Jessica Wasserman 04- Beau Finley; 05- Emma Hersh; 06-Angela Bradbery 07- Maureen Kinlan Boucher; 08-Malia N. Brink; 09-Nancy MacWood P.O. Box 4966 Washington, DC 20008 Website http://www.anc3c.org Email all@anc3c.org

ANC3C Resolution 2018-020 Request for a Comprehensive DDOT Study of Current Connecticut Avenue Traffic Patterns and Potential Changes

WHEREAS, while the District Department of Transportation (DDOT) has produced studies of the Connecticut Avenue corridor in Van Ness (2003) and Cleveland Park (2013), DDOT has not comprehensively examined the entire corridor, nor has DDOT reviewed the costs and benefits associated with the reversible lanes policy; and

WHEREAS, ANC 3F and Van Ness Main Street, have called on DDOT to conduct research and analysis of changes that could be made to Connecticut Avenue, including the elimination of reversible lanes during rush hour, to increase walkability, safety, and parking; and

WHEREAS, the Commissioners for ANC 3C04 and 3C05, in partnership with two constituents, released a survey during the summer of 2017; of the 437 Cleveland Park residents who responded, 71.4% expressed support for a study of the existing reversible lanes policy; and

WHEREAS, Cleveland Park residents and business interests have voiced concerns related to pedestrian, cyclist, and vehicular safety, walkability, insufficient parking, environmental, and other "quality of life" issues that cannot be appropriately addressed by relying on outdated studies; and

WHEREAS, as of May 21, 2018, there has been no comprehensive study conducted of the Connecticut Avenue reversible lanes that considers the range of community interests involved, among them business access, cut-through traffic, safety on local streets, and volume and capacity on Wisconsin Avenue.

NOW THEREFORE BE IT RESOLVED, that ANC 3C requests that DDOT conduct a comprehensive study of current Connecticut Avenue traffic patterns that broadly evaluates the potential consequences of any changes in policy and also considers a wide range of potential improvements or changes that could be made, including but not limited to changing the rush hour reversible lanes policy, establishing dedicated bicycle lanes, and creating other dedicated lane options; and

BE IT FURTHER RESOLVED, that the study should include research and analysis of pedestrian and other non-vehicle use and traffic patterns along Connecticut Avenue in the sections affected by the reversible lanes as well as the existing reversible lane signage and electric signal boxes; and

BE IT FURTHER RESOLVED, that overall goals of the study should be to enhance pedestrian, cyclist, and vehicular safety, walkability, the environment, and overall economic vitality of the affected neighborhoods, and make improvements to traffic management on Connecticut Avenue and surrounding streets; and

BE IT FURTHER RESOLVED, that the study should include research and analysis from other city agencies such as the Department of Energy and the Environment, the Department of Public Works, and the Metropolitan Police Department regarding the environmental and safety impact of any recommended improvements or changes that could be made to Connecticut Avenue;

BE IT FURTHER RESOLVED, that the study include evaluation of possible alternatives including parking in the non-rush hour right lane, bicycle lanes and a bus rapid transit lane; and

BE IT FURTHER RESOLVED, that as DDOT considers the scope of its study, ANC 3C requests that it consult with all applicable interested community groups; and

BE IT FURTHER RESOLVED, that the Chair and Commissioners for ANC 3C04, 3C05 or their designees are authorized to speak on behalf of ANC 3C on this matter.

Attested by

Nancy J. MacWood

Chair, on May 21, 2018

This resolution was approved by a voice vote on May 21, 2018 at a scheduled and noticed public meeting of ANC 3C at which a quorum (a minimum of 5 of 9 commissioners) was present.

RESOLUTION REQUEST A COMPREHENSIVE DDOT STUDY OF CURRENT CONNECTICUT AVENUE TRAFFIC PATTERNS AND POTENTIAL CHANGES

March 20, 2018

WHEREAS, the most recent comprehensive study of Connecticut Avenue traffic and safety issues, the Connecticut Avenue Transportation Study, was released 15 years ago, in 2003; and

WHEREAS, ANC 3F's continued development and increasing density since 2003, particularly along the Van Ness corridor, has raised concerns related to pedestrian safety, business interests, and other "quality of life" issues that cannot be appropriately addressed by relying on a 15-year-old study; and

WHEREAS, ANC 3F's Streets & Sidewalks Committee and community groups such as Van Ness Main Street have previously called on the District Department of Transportation (DDOT) to conduct research and analysis of changes that could be made to Connecticut Avenue, including the elimination of reversible lanes during rush hour; and

WHEREAS, there has been no comprehensive study ever conducted of the Connecticut Avenue reversible lanes that takes into account the multiple community interests involved; and

WHEREAS, ANC 3F's Streets & Sidewalks Committee has previously met with representatives from ANC 3C and ANC 3/4 G to discuss these issues and comprehensively address the stretch of Connecticut Avenue from that extends from Woodley Park to Chevy Chase; and

WHEREAS, ANC 3F's Streets & Sidewalks Committee unanimously passed a resolution "Recommending ANC 3F Request a Comprehensive Study of Current Connecticut Avenue Traffic Patterns and Potential Changes" and established a subcommittee with the purpose of providing support for and assistance with the proposed study following its March 2018 meeting by a vote of 9 in favor and 0 opposed (9-0).

NOW THEREFORE BE IT RESOLVED, that ANC 3F requests that DDOT conduct a comprehensive study of current Connecticut Avenue traffic patterns that broadly evaluates the potential consequences of any potential changes in policy and also considers a wide range of potential improvements or changes that could be made, including but not limited to changes to the rush hour reversible lanes policy, establishing dedicated bicycle lanes, and establishing other dedicated lane options; and

BE IT FURTHER RESOLVED, that the study should include research and analysis of pedestrian and other non-vehicle use and traffic patterns along Connecticut Avenue in the sections affected by the reversible lanes, including a specific focus on the Van Ness corridor; and

BE IT FURTHER RESOLVED, that overall goals of the study should be to enhance pedestrian safety, walkability, and overall economic vitality of the affected neighborhoods, and make improvements to traffic management on Connecticut Avenue and surrounding streets; and

BE IT FURTHER RESOLVED, that the study should include research and analysis from other city agencies such as the Department of Energy and the Environment (DOEE) regarding the environmental impact of any recommended improvements or changes that could be made to Connecticut Avenue;

BE IT FURTHER RESOLVED, that as DDOT considers the scope of its study it consult with all applicable interested community groups; and

BE IT FURTHER RESOLVED, that Commissioners Pat Jakopchek, Bill Sittig and David Dickinson are authorized to speak on behalf of ANC 3F on this matter.

ANC 3F PASSED this resolution at its meeting on March 20, 2018, which was properly noticed and at which a quorum was present, by a vote of 6 in favor, 0 opposed, and 0 abstaining.

ANC 3/4G Resolution Requesting That DDOT Conduct a Comprehensive Study of Current Connecticut Avenue Traffic Patterns and Potential Changes

- 1. The District Department of Transportation (DDOT) has studied portions of the Connecticut Avenue corridor in Van Ness (2003) and Cleveland Park (2013) but has not comprehensively examined the entire corridor, particularly the pros and cons of the current reversible rush hour lanes between Calvert Street and Military Road.
- 2. ANCs 3C and 3F have passed resolutions asking DDOT to research and analyze changes that could be made to Connecticut Avenue, including the elimination of reversible lanes during rush hour and steps to increase walkability, safety, and parking.
- 3. Any changes to the current traffic patterns on Connecticut Avenue may have ramifications in ANC 3/4G e.g., for the portion of Connecticut Avenue that currently has reversible lanes from Nebraska Avenue to Military Road, for the potion of Connecticut Avenue that does not currently have reversible lanes north of Military Road, and for neighborhood streets like Reno Road, Nebraska Avenue, Military Road, Nevada Avenue, and Chevy Chase Parkway that may receive additional traffic from any changes made on Connecticut Avenue.
- 4. The intersections of Connecticut Avenue and Nebraska Avenue and Connecticut Avenue and Military Road are particular concerns because the timing and sequencing of the stop lights during rush hours causes substantial backups at Nebraska Avenue, and Military Road.

- 5. For these reasons, ANC 3/4G urges DDOT to conduct a comprehensive study of current Connecticut Avenue traffic patterns that broadly evaluates the potential consequences of any changes in policy and also considers a wide range of potential changes that could be made, including but not limited to changes in the rush hour reversible lanes policy, adjusting the timing of stop lights, establishing dedicated bicycle lanes, and creating other dedicated lane options.
- 6. DDOT's study should also include research and analysis of pedestrian and other non-vehicle use and traffic patterns along Connecticut Avenue in the sections affected by the reversible lanes as well as the existing reversible lane signage and electric signal boxes.
- 7. DDOT's study should expressly consider the impact that any changes may have on traffic patterns on streets other than Connecticut Avenue, including but not limited to Nebraska Avenue, Military Road, Reno Road, Nevada Avenue, and Chevy Chase Parkway.
- 8. DDOT's study should also evaluate the impact of any changes on businesses and parking in the portion of Connecticut Avenue north of Military Road, including the possible backup of traffic to and through Chevy Chase Circle and the impacts of the resulting congestion on the Chevy Chase business district.
- 9. In conducting this study, DDOT should consult with ANC 3/4G and particularly the Chair and Commissioners representing Single Member Districts 3/4G05, 3/4G06, and 3/4G07, which include portions of Connecticut Avenue. DDOT should also consider any applicable recommendations from ANC 3/4G's Parking Task Force, which is currently examining parking regulations along Connecticut Avenue.

Approved by ANC 3/4G after a discussion at its regularly scheduled and noticed October 22, 2018 meeting by a vote of 5 to Q (a quorum being 4).

Randy Speck, Chair

Rebecca Maydak, Secretary

CONNECTICUT AVENUE NW REVERSIBLE LANE OPERATIONS AND SAFETY STUDY

Appendix D – Safety Comparisons

COMPARISON OF THE CONNECTICUT AVENUE NW AND WISCONSIN AVENUE NW CORRIDORS

A statistical analysis was performed to compare crash frequencies for Connecticut Avenue NW and a comparison corridor, Wisconsin Avenue NW. The Wisconsin Avenue NW comparison corridor runs from Western Avenue NW to Calvert St NW and is roughly the same length as the Connecticut Avenue NW study area. Traffic volume data for Connecticut Avenue NW and Wisconsin Avenue NW shows the corridors are roughly comparable with AADTs on Connecticut Avenue ranging from 23,613 to 31,814 vehicles per day and Wisconsin Avenue NW ranging from 23,609 to 28,109 vehicles per day.

The comparison analysis showed that, in a given week, significantly *more* crashes are likely to occur on Connecticut Avenue NW than on Wisconsin Avenue NW during reversible lane hours. However, during non-reversible lane hours, significantly *less* crashes are likely to occur on Connecticut Avenue NW than on Wisconsin Avenue NW. Therefore, it is possible that the reversible lane operations (and volumes) influence crash potential on Connecticut Avenue NW.

Number of Crashes Per Work Week During Reversible Lane Operations

As a part of this analysis, the average number of crashes per week was computed for days/times when reversible lane operations are in effect on Connecticut Avenue NW, as well as for days/times when normal lane operations are in effect from 9:30 AM to 4:00 PM. As shown on **Table E-1**. This analysis was done using the crash interevent time, which is the time (in days) between each crash. The time period used to calculate the crash interevent time for reversible lane operations was based on the five peak hours each weekday when reversible lanes are in effect. Normal lane operations consisted of the 6.5 hours between the AM and PM reversible lane hours. Comparable crash data were examined for Wisconsin Avenue NW.

There were 664 crashes reported in the Connecticut Avenue NW study area during reversible lane operations and 418 crashes on Wisconsin Avenue NW during the same five-year period. Using the reversible lane hour crashes for both segments, the average number of crashes per workweek during reversible lane hours was analyzed.

	Connecticut Avenue NW	Wisconsin Avenue NW
Mean	2.66	1.63
Median	2.65	1.55
Standard Deviation	0.10	0.08
95% Confidence Interval	(2.45, 2.85)	(1.45, 180)

Table E-1: Average Number of Crashes per Workweek: Reversible Lane Hours

Overall, during the weekday Connecticut Avenue reversible lane hours, the average number of crashes per workweek during reversible lane hours is 2.66 for Connecticut Avenue NW and 1.63 for Wisconsin Avenue NW. The median values are very close to the mean. This shows that the average number of Connecticut Avenue NW work week crashes during reversible lane hours is approximately 39% higher than on the Wisconsin Avenue NW comparison corridor.

Figure E-2 shows the graph of the two distributions during reversible lane operations. The probability that the number of weekly crashes on Wisconsin Avenue NW during reversible lane hours (on Connecticut Avenue NW) will exceed the number of weekly crashes during reversible lane hours on Connecticut Avenue NW is close to zero. In general, this means that in any given week, Connecticut Avenue NW is almost guaranteed to have more crashes during the reversible lane hours than on Wisconsin Avenue NW (within the study segments).

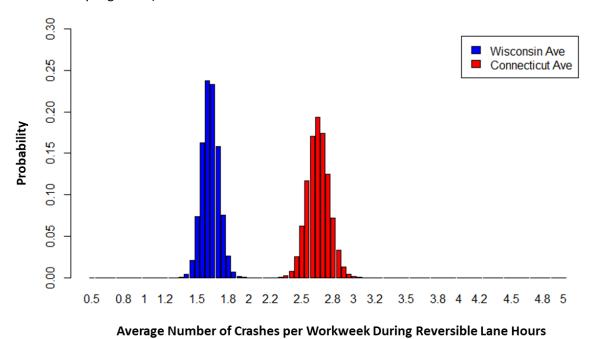

Figure E-1: Average Crash Number for Connecticut Ave and Wisconsin Ave Reversible Lane Operations

The analysis also revealed that the probability of zero crashes occurring on Connecticut Avenue in a week of reversible lanes is roughly 7%, whereas Wisconsin Avenue NW has roughly a 20% chance of zero crashes. This means that the study segment Wisconsin Avenue NW is 65% more likely to not have a crash during reversible lane hours than Connecticut Avenue NW during any given week.

Number of Crashes Per Work Week Between 9:30 AM and 4:00 PM (Non-RL Operations)

To complement the reversible lane analysis, the 6.5 hours between the AM and PM reversible lane operations was compared. Using the same days that the reversible lanes were in operation, the average number of crashes per work week between 9:30AM and 4:00PM was calculated. There were 322 crashes on Connecticut Avenue NW and 385 crashes on Wisconsin Avenue NW during this time period. **Table E-3** shows the distributions for each of the following parameters:

	Connecticut Avenue NW	Wisconsin Avenue NW
Mean	1.28	1.52
Median	1.30	1.50
Standard Deviation	0.07	0.08
95% Confidence Interval	(1.15, 1.40)	(1.35, 1.65)

Table E-3: Average Number of Crashes per Workweek: Non-Reversible Lane Hours 9:30AM to 4:00PM

Overall, during the non-reversible lane hours of the weekday workweek, the average number of crashes per workweek is 1.28 for Connecticut Avenue NW and 1.52 for Wisconsin Avenue NW. The median values are very close to the mean. This shows the average number of Connecticut Avenue NW workweek crashes during non-reversible lane hours is approximately 19% lower than on the Wisconsin Avenue NW comparison corridor.

As a general comparison of the two corridors, the crash interevent time was reviewed for the entire five-years of crash history. During this timeframe, 1,507 crashes were reported within the Connecticut Avenue NW study area and 1,306 crashes within the Wisconsin Avenue NW study area. From the calculated distributions for all crashes, the following parameters were calculated for the crash rate per 7-day week (Table E-4):

	Connecticut Avenue NW	Wisconsin Avenue NW
Mean	5.40	4.50
Median	5.35	4.45
Standard Deviation	0.73	0.67
95% Confidence Interval	(4.05, 6.90)	(3.30, 5.90)

Table E-4: Average Number of Crashes per 7-Day Week

Given that the distribution for crashes during normal lane operations has a higher average number of crashes per week on Wisconsin Avenue NW than on Connecticut Avenue NW, it can be assumed that the major difference between the two corridors distributions is possibly attributed to the reversible lane operations.
